

# WC Dillon Masters ACA Reporting with Employee Navigator

## THE CHALLENGE

Cassidy Bartemus, WC Dillon's HRIS Administrator and Employee Benefits Specialist, and her CFO both went through a hectic open enrollment and were looking for a solution for ACA reporting to ease their administrative burden. They were creating 1095 forms manually, which proved to be tedious and time consuming. WC Dillon began looking for a solution that would streamline their compliance process both internally and for their customers.

## THE SOLUTION

WC Dillon's sister company, Insight, introduced them to Employee Navigator. Our software was able to help them more efficiently manage ACA reporting for their customers including: tracking and categorizing employees, importing health plan enrollment data, and calculating affordability and monthly FTE. Employee Navigator's functionality enabled WC Dillon to deliver an affordable end-to-end ACA and 1095 reporting solution that measurably reduced their administrative workload.

## THE RESULTS

Today, WC Dillon discusses Employee Navigator to every client with over twenty-five employees, and currently has over one thousand employees on the system. Employee Navigator has become an integral part of WC Dillon's operations, reducing the risk of human error by minimizing manual data entry. Cassidy is currently working on their first payroll integration and adding to their list of carrier integrations to drive further efficiencies for their customers.

“Do it before the competition does.”
